PROFESSIONAL SUMMARY

Marketing Operations Engineer with a background in Biomedicine, specializing in building scalable automation infrastructure, data integration, and RevOps systems. Proven expertise in designing and implementing complex workflows using n8n, Python, and cloud technologies. Passionate about transforming business processes through data-driven solutions and contributing to the digital transformation of the healthcare sector (HealthTech).

CORE COMPETENCIES

Automation & Workflows

n8n • Zapier • Make • ManyChat • Webhook Integration

Programming & Data

Python • JavaScript/TypeScript • SQL • Selenium • Web Scraping

Marketing & CRM Platforms

ActiveCampaign • RDStation • Clint

Cloud & Infrastructure

Google Cloud • Supabase • PostgreSQL • API Development

Data & Analytics

SQL • Data Pipelines • Web Scraping • Data Analysis

Methodologies

Marketing Operations • RevOps • API Integration • Automation Infrastructure

PROFESSIONAL EXPERIENCE

Marketing Operations Engineer

Unilever | Remote | 2022 – Present

- Architected and deployed 15+ n8n workflows automating lead qualification, data enrichment, and CRM synchronization, reducing manual processing time by 60%
- Developed Python scripts with Selenium for automated data collection and validation across multiple marketing platforms
- Integrated ActiveCampaign, RDStation, and Meta Conversion API for real-time campaign performance tracking
- Built custom landing pages using Unbounce and Framer, optimizing conversion funnels for B2B campaigns
- Designed ManyChat automation sequences for customer engagement and lead nurturing
- Collaborated with sales and marketing teams to establish RevOps best practices and KPI dashboards

Data Analyst

Healthcare Analytics Startup | Remote | 2021 – 2022

- Analyzed patient data and clinical workflows to identify optimization opportunities
- Created SQL queries and Python scripts for data validation and reporting
- Supported the development of healthcare dashboards for operational insights

Biomedicine Technician

Clinical Laboratory | Brazil | 2019 – 2021

- Performed laboratory analysis and quality assurance procedures
- Developed analytical and precision-focused approach to problem-solving

EDUCATION

Bachelor of Science in Biomedicine

University of São Paulo (USP) | Brazil | 2019

Certifications & Continuous Learning

- n8n Workflow Automation
 - Python for Data Science & Automation
 - RevOps Fundamentals
 - API Integration & REST Services
-

FEATURED PROJECTS

Rede Mais Onco - Healthcare Hackathon

Developed automation infrastructure for healthcare data integration, demonstrating expertise in oncology data management and integration workflows.

Automation Systems Framework

Built scalable automation infrastructure using n8n, including data validation, error handling, and monitoring systems for marketing operations.

Data Analytics Python Projects

Collection of Python projects showcasing data analysis, web scraping, and automation capabilities for business intelligence.

SQL Data Analysis

Advanced SQL queries for complex data analysis and performance optimization in marketing and operations contexts.
